- Spring Data JPA (Basics)
- Microservice (Basics)

## EXPERIENCE

### Internship (February 2022 To July 2022)

Cognizant Technology Solution

### Programmer Analyst Trainee (01 September 2022 To 01 September 2023)

Cognizant Technology Solution

### Programmer Analyst (From 01 September 2023)

Cognizant Technology Solution

## PROJECTS

### Bank Application [ Microservice | Spring Boot | MySQL]

November 2023 – Ongoing

In this microservices architecture, three distinct services—Account Service, Loan Service, and Cards Service—have been developed to handle specific functionalities. These services are designed to work independently and communicate seamlessly. The communication is facilitated by using `RestTemplate`, allowing each service to interact with the others via RESTful API calls. And I have used MySQL database to store account related information's

### IMDB User Rating [React JS| Tailwind CSS]

November 2023 – December-2023

- Used IMDB Movie API
- React Application that seamlessly integrates with the IMDB API allowing users to search for movies by name  
The application empowers users to provide ratings to their favorite films and conveniently add them to personalized watch list  
PROJECT LINK:- <https://imdb-user-review.netlify.app>

### React Quiz Application

July 2023 – September 2023

- Used Local JSON Data
- This React quiz app features a user-friendly interface with four answer options per question, where only one is correct. Each question carries a specified point value, contributing to the overall score. The app incorporates a timer. Users navigate through a series of questions, selecting answers within the time limit to maximize their score. The project combines React components for seamless interaction and a dynamic user experience.
